

# Primeros pasos

- Registro de la aplicación

# Registro de la aplicación

Antes de poder utilizar la aplicación debe registrarla. A partir del momento del registro tendrá un mes de uso sin coste para poder probarla.

Para registrar la aplicación, abra la página "DNS Updater" y verá un mensaje en la parte de arriba indicando que debe registrar la extensión.

The screenshot shows the 'DNS Updater' interface. At the top, there is a navigation bar with a back arrow, the title 'DNS Updater', and several icons (edit, share, add, delete, bookmark, copy, link). Below the title, a teal notification banner reads: 'X You have to register Extension for "Dynasoft DNS Updater". Go to Extension info'. Underneath, there are buttons for 'Update DNS', 'Show Activity Logs', and a menu with 'Actions', 'Automate', and 'Fewer options'. The main content is divided into two sections: 'General' and 'What's My IP'. The 'General' section displays 'Last Update' as '11/05/2023 18:29', 'FQDN' as 'msweua3554t95990466.bc-saas....', 'IP Address' as '20.107.238.57', and 'Job Queue Status' as 'The Job Queue Entry is ready, t...'. The 'What's My IP' section shows 'My IP' as '20.107.238.57' and a 'Message' box stating 'DNS is up to date' in green text.
